

Formicary™ CalypsoConnect

Cuts integration cost and decreases project risk

CalypsoConnect is a standardised set of connectors that allows users to create bilateral exceptions based data flow when importing or exporting trades or static data to and from Calypso™. One of the driving factors behind CalypsoConnect is the ability to provide a higher level, business oriented layer on top of the lower level connectivity components, to shift focus from technical issues to business logic, rapidly moving into data flow mapping and functional requirements.

CalypsoConnect cuts integration cost by shortening the implementation time and decreases the project risk through the use of proven framework to unify and simplify dataflow.

Overview

New users to any complex trading application can spend a long time learning the intricacies of a system's underlying data schematics. CalypsoConnect reduces this learning curve by providing tools to facilitate seamless integration into an institution's new and existing business processes.

The real value of CalypsoConnect libraries comes when institutions utilise the power of Formicary Connect to create bilateral data flow between our other standardised connectors and Calypso. Formicary Connect is a component based software framework used to accelerate the implementation process. The components may be built as stand-alone modules or assembled as packages using multiple interfaces. Encouraging reusability,

Formicary Connect has pre-configured exceptions/error handling and workflow that functions out of the box with our other standardised connectors for Murex™, Misys Summit FT™, DTCC™, Markit™ Wire (formerly Swapwire), Fidessa®, SunGard Martini™. This gives institutions guaranteed point to point bilateral dataflow with the potential to save an even greater percentage of their overall implementation/upgrade budgets.

Advantages of CalypsoConnect

Component based design

- Existing modules may be deployed off the shelf, giving immediate hands-on experience and the ability to test basic data flow ideas in very early stages of the development process.
- Warranted connector for complete extraction of supported asset class data information from Calypso.
- Radically shortened implementation time.
- Focus can be shifted from technical issues to business logic, effectively separating the business layer from the technical implementation.

Additional Advantages of Formicary Connect

Formicary Connect is tailored to the needs of the financial services industry, capitalising on the 10 years collective experience of Formicary Ltd. It is solely dedicated to software integration for the financial services industry.

- Software issues are greatly reduced, resulting in production grade solutions.
- Leverage bilateral dataflow exceptions between Calypso and other supported connectors such as Murex, Misys Summit FT, DTCC, Markit Wire (formerly Swapwire), Fidessa, SunGard Martini, etc.
- Built your own connectors by leveraging on our tried and tested connector framework.
- Leverage existing trading and data solution so that lifecycle management becomes a natural trait rather than a problem.

Asset Class Coverage

CalypsoConnect is warranted to support the bilateral data flow for the following asset classes.

Equity Derivatives

- Index & Single Stock options
- Vanilla

Credit Derivatives

- CDS Single Name
- Corporate CDS
- Basket CDS

Equities

- Cash Equities

Fixed Income

- Bullitt
- Amortising
- Inflation-linked

Interest Derivatives

- Swaps
- Inflation-linked Swaps
- Cross Currency Swaps

Futures & Options

- All Exchange Traded futures and options supported by Calypso

Foreign Exchange

- Spot
- Forward
- Swaps

Money Market

- Loans
- Deposit
- CD
- CP

Repo

- Open
- Term
- Buy/Sell
- Borrow/Lend

About Formicary

Formicary is an information technology company that specialises in building integrated applications/solutions to maximise business efficiency and streamline business processes for the Financial Services industry.

Founded in 2000, Formicary brings together a world class team of talented and dedicated professionals with industry experience covering Unified Communications (particularly Persistent Group Chat) and Cross Asset Trading applications. This knowledge, coupled with technical excellence ranging from legacy client/server to cutting edge technologies, enables Formicary to offer innovative and sophisticated services and software to help clients improve their productivity and increase their return on investment.

Formicary has offices in Europe, North America and Asia Pacific.

Formicary™ is a registered trademark of Formicary Ltd. All other company and product names mentioned may be trademarks of the respective companies with which they are associated.
