

Formicary MyChat™

Personal search solution for IM and Group Chat

Formicary MyChat provides the unique capability for individual users to easily search their private or group chat history securely via a web browser. A module of Formicary ChatSeer 2.0, MyChat is portal-based and unlike Chat History or Back Chat, it searches and retrieves secured data in their native format which is stored in a non-repudiation system.

MyChat is compatible with all the major enterprise messaging and web conferencing systems. It is designed for individual users who need access to secured chat history without having to approach the IT or Compliance Team for the information.

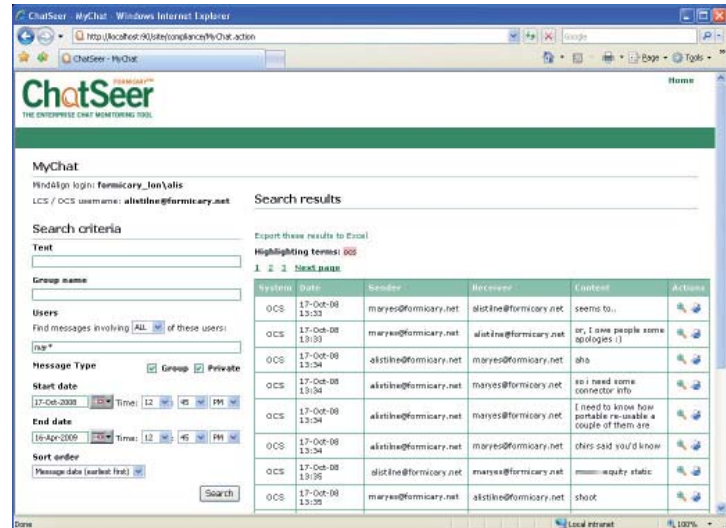

Search Features

- Perfect chronological reconstruction of any private or group conversation
- Ability to search amongst private or group messages only
- Exports to Microsoft Office Excel or chosen format for review purposes
- Wildcard, Fuzzy, Proximity, Range and Boolean functionality amongst others
- Search text within associated attachments
- Configurable search options including:
 - One-to-One, One-to-Many & Group Chat
 - Keyword or terms
 - Sender, Viewer and/or Group
 - Adjustable time/date parameters
- Key word highlighting
- Search engine format view
- Stores previous searches

Example of use

In an Investment Bank, a trader uses IM for pre-trade negotiations and needs to refer back to the conversation for confirmation of the agreed details. The trader can quickly search back through their own message history rather than request IT or compliance to retrieve the data, saving time and cost.

About ChatSeer™ 2.0

ChatSeer is an advanced enterprise compliance solution designed specifically to ease discovery and investigation requests for the next generation of Instant Messaging (IM) applications which include one-to-one, one-to-many, group based chat and web conference data. ChatSeer sends all IM communications to secure, tamper proof storage facilities. It then identifies and indexes, in its native format, enabling authorised personnel to quickly search and retrieve all archived data. ChatSeer connects to Office Communications Server (OCS) 2007 R2 including Group Chat, Office Live Meeting, OCS 2007, Live Communications Server (LCS) 2005, Parlano's MindAlign, Reuters Messaging 6 and AOL, MSN and Yahoo! via PIC.

Formicary, ChatSeer and MyChat are trademarks or registered trademarks of Formicary Ltd. All other company and product names mentioned may be trademarks of the respective companies with which they are associated.
